

MADONNA REHABILITATION DAY PROGRAM LINCOLN

The Madonna Rehabilitation Day Program-Lincoln (RDP) is coordinated outpatient therapy dedicated to help adults and children with a physical or cognitive disability learn to function more independently in their home and community. RDP provides an intense and holistically-oriented approach that includes medical monitoring, coordinated therapies and education.

AVERAGE AMOUNT OF THERAPY

Treatment plans are designed to meet individual needs and insurance coverage. The graph below indicates, on average, the number of days patients received therapy last year:

Therapy	Days
Physical	18
Occupational	16
Speech	13.4

As a part of RDP, patients may also receive recreational therapy, social work services, rehabilitation nursing, rehabilitation psychology and/or nutrition services.

PATIENT SATISFACTION

96% of people in RDP rated their overall experience as excellent.

98% of people in RDP said they would definitely recommend Madonna to family and friends.

140 NUMBER OF PEOPLE SERVED

Program	# Served
Brain Injury	26
Stroke	58
Neuro	10
Spinal Cord Injury	17
Cancer	2
Amputee	2
Post-COVID	8
Other	17

The average age was **56** years old, including **10** children and adolescents.

MADONNA

REHABILITATION DAY PROGRAM - LINCOLN

LENGTH OF PROGRAM

Patients are seen 3-5 days per week while in RDP. Last year, adults attended RDP for an average of **17** non-consecutive days. Children and adolescents attended an average of **15** non-consecutive days.

INDEPENDENCE LEVEL

Patients in Madonna’s Rehabilitation Day Program made progress toward independence as measured by the Functional Assessment Measure (FAM). Activities including cognitive, behavioral, communication and communication functioning are rated on a 1-7 scale and totaled. On average, people in RDP admitted requiring minimal assistance and discharged requiring supervision to modified independent level of care. Below is a representation of average FAM score change in RDP:

DISCHARGE

Long term goals met at discharge for adults was **85%** and children/adolescents was **100%**. Many individuals will require intermittent outpatient therapy after their discharge from RDP. Depending upon where you live, this could occur at Madonna or in your home community.

Transition/Discharge Plan	# Served
Completed Program no further treatment recommended	18
Madonna OP	69
OP in a Home Community	33
Skilled Facility	1
Home Health	4
Did Not Complete Program	2
Return to Acute	9
Other	2

Patients returning to acute during their RDP stay are able to return and complete the program if medically stable with a physician order.

ACCREDITATION

Madonna Rehabilitation Hospitals have received the highest possible level of distinction from the Commission on Accreditation of Rehabilitation Facilities (CARF) for its overall Outpatient Medical Rehabilitation Program as well as its outpatient Brain Injury, Spinal Cord Injury, Stroke and Pediatric Specialty Programs.
